

Autumn Fruits and Seeds

The Parks Trust
MILTON KEYNES

Did you know that most plants produce seeds every year so that they can keep their population going? That is why we have fruits, seeds and nuts. Wildlife rely on these seeds for food, especially over winter when there aren't so many insects around. Go on an Autumn scavenger hunt and tick off any fruits, seeds and nuts you see!

Berries Elder

Crab Apple Crab Apple

Fruit London Plane

Seed Lime

Haw Hawthorn

Berries Rowan

Berries Holly
