

# Habitat Survey

Take a wander around your schoolgrounds or garden and see what habitats you can find. Put a tick every time you find something in the list below, even if you find the same thing more than once. The more you spot and the wider range of habitats/habitat features you find, the better it is for the creatures that call them home!

*Did you know?*  
The perfect habitat should have:

Food

Water

Shelter

Space

for the plants and animals living there!

Brambles

Log pile

Long grass

Plant with berries

Bird feeder

Wildflower area

A drinking spot

Compost heap

A lone tree

Weedy area

Tree with nuts

Short grass

Plant with flowers

Rock pile

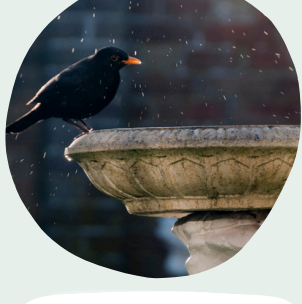

Small woodland (3+ trees)

Bird house

Bird bath

Small pond

Nettle patch

Bug hotel

Habitat score:

Once you have finished your habitat survey, count up all your ticks. Give yourself a point for each one you find and write it here. Can you find a space where you could add more habitats this year? Repeat this survey again every 6 months and aim to increase your score each time!
