Make an Animal Wrapping

The Parks Trust
MILTON KEYNES

Use up old resources while creating your own little creature!

What you'll need:

Cardboard

Colourful string, wool or material cut into strips

Scissors

Glue and tape

White paper and coloured pens

How to make your creature:

Step 1:

Use the template or draw the shapes of your chosen animal onto a piece of cardboard. Think about their body shape, their head and a tail if they have one.

Step 2:

Carefully cut out your shapes. Then use your scissors to cut small notches around the edges of your shapes to hold the wool in place.

Step 3:

Choose some wool that is the colour of your chosen animal. Cut a long length of string and tape the end to the back of your shape. Wrap it round, gently pulling it into the notches to keep it secure. Tape the end to the back of the shape once you have enough colour on there.

Step 4:

Repeat Step 3 with different colours and on your different shapes depending on how many you have.

Step 5:

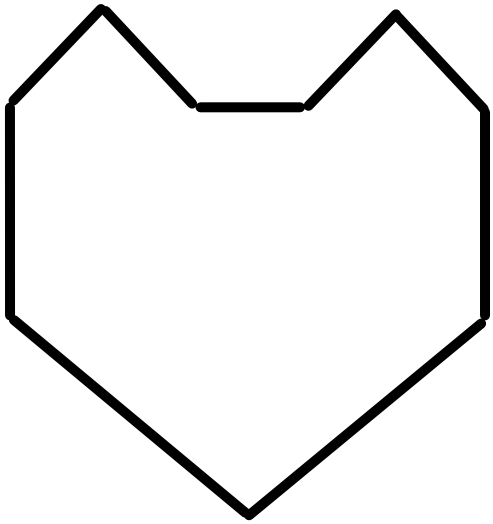

Add any extra features like eyes and ears by drawing and cutting shapes out of paper and gluing them on. Add a loop to hang your creature if you want to!
